# HOW TO CERTIFY **RAW MATERIALS**

WITH NATRUE

WHO: for producers, third-party manufacturers, and brand owners.

WHAT: natural or organic ingredients for cosmetic products. HOW: third-party certification or approval by a NATRUE Approved

> - **\***--Follow these five steps:

## **DEFINE THE ORIGIN**

Is your raw material natural or organic?

- · Not from organic agriculture (natural or derived natural): Documentation check only (NO audit required) = approval;
- · From organic agriculture: documentation check + on-site inspection (audit) = certification.
  - Exception: If your raw material is certified to a regulation or standard in the IFOAM Family of Standards without further processing, your raw material is automatically accepted. This means you don't have to certify it with NATRUE ..

### **CHOOSE YOUR CERTIFIER**

NATRUE is not a certifier Certification is only carried out by independent and accredited third-parties (NACs.)

- · NATRUE does not certify or approve directly in order to make the whole process more independent and transparent.
- · NATRUE is the Standard owner. The Standard is developed and interpreted by the NATRUE Scientific Committee and controlled by independent NATRUE approved certifiers.

#### **CONTACT YOUR CERTIFIER**

Choose one of these international NATRUE Approved Certifiers (NACs) to guide you through the whole certification or approval process. We recommend you to contact 2 or 3 certifiers to compare their services, availability, and costs. All of them are listed on our

NB!: We know you want to get the NATRUE certification asap, so we help you! You need to complete the NATRUE Label User Agreement for approved/certified raw materials, and send it back to us. You can find that document at the bottom of this link.

There are two costs you need to take into account:

- 1. Cost of the certification --- invoiced entirely by your chosen NAC and independent of NATRUE;
- €50\* per raw material for a two-year certification.

\* Label fee can be grouped, i.e.: single oils, defined plant extracts, and raw materials with the same INCI composition are invoiced collectively. For example, for 10 plant oils, the label fee would be €50 and not €500.

#### DONE

Once your raw materials have successfully been approved or certified, you will be issued with a certificate. Your raw materials will be then added to NATRUE's online database.
